Art Unit: 1652

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-26, drawn to a method of producing a recombinant peptide, a, classified in class 345, subclass 69.1.
- II. Claim 27, drawn to an expression vector, classified in class 435, subclass 320.1.

Inventions of Group II and I are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, invention of Group II, the expression vector, can be used for transforming a cell or production of antibodies and not for the method of recombinant synthesis of protein.

Inventions I and III are distinct for the reasons given above and have acquired a separate status in the art. Because of their recognized divergent subject matter and/or different classification and required searches, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
